

MICHAEL CARRICARTE

"Jackson Memorial Hospital, one of the world's finest medical centers, has a double mission: to take care of our less fortunate as well as our paying patients – and it only stands to reason that we must do what we can to strengthen this mission."

At Jackson, world class does not simply mean being among the best in the world. It also means serving the people of the world.

As the founder and CEO of Amedex Insurance Company, the largest provider of health and life insurance products to Latin America and the Caribbean, and now a division of BUPA International, Michael Carricarte understands Jackson's growing role as a destination for international patients seeking the highest quality care, services and facilities. He also recognizes that these patients require specialized services to smooth their way and ease their anxiety.

Thanks to Mike Carricarte, the BUPA International Patient Reception Center of Jackson Memorial Foundation greets our international patients and meets their unique needs. These services, including translation assistance, travel coordination and concierge services, make patients and visitors from overseas feel welcome, further enhancing Jackson's reputation as a facility offering exceptional care and comfort, with sensitivity to the culture and customs of our patients.
